MANOJ MOURYA

manojkumarmaurya9372@gmail.com | +91 9372313346 | www.linkedin.com/in/manoj-maurya | ManojMaurya207

PROFESSIONAL SUMMARY

iOS Developer with hands-on experience building and maintaining healthcare and utility applications using Swift and SwiftUI. Experienced in offline-first application workflows, background processing, media handling, and cross-platform collaboration within production environments. Strong understanding of modern iOS development patterns, state management, and performance-focused mobile engineering.

EDUCATION

Vivekanand Education Society's College of Arts, Commerce and Science, Chembur, Mumbai, Maharashtra
Bsc. Computer Science | CGPA: 9.67 | **July 2022 - April 2025**

WORK EXPERIENCE

Junior Mobile Application Developer | MedPrime Technologies | Mumbai ~10 Months

- Maintained and enhanced applications within the Cilika ecosystem used in clinical environments.
- Developed local medical record sharing features across Android and iOS platforms
- Integrated Firebase Crashlytics and resolved production issues impacting application stability
- Implemented offline-first workflows and background image-processing features for medical diagnostics applications.
- Collaborated across mobile teams to deliver consistent cross-platform functionality

PROJECTS

Cilika Retic (Production Healthcare App) | SwiftUI | Background Tasks | Image Processing **|** *link*

- Built background processing workflows for medical image analysis involving reticulocyte and RBC detection
- Optimized task execution to support long-running image-processing operations efficiently
- Contributed to stable offline workflows used in clinical diagnostic environments

StealthShield | Android, Kotlin, Jetpack Compose, Firebase, Google Maps SDK, Geocoding API **|** *link*

- Developed a robust theft-prevention Android app with advanced features such as real-time tracking, geofencing, fake shutdown simulation, and unauthorized access detection using Jetpack, Firebase, and the Google Maps SDK.
- Implemented Dagger-Hilt for clean dependency injection and to ensure a modular, scalable architecture.
- Optimized background services for continuous location tracking, focusing on memory efficiency and battery-friendly operation using Android lifecycle-aware components.

TECHNICAL SKILLS

- **Languages:** Swift, Kotlin, Java, Python
- **Databases:** Firebase, Firestore, SQLite
- **iOS Development** : SwiftUI, State Management, Background Tasks, Navigation, Media Handling
- **Tools & Libraries:** Xcode, Git / Github, Firebase Crashlytics
- **Cross-Platform Exposure :** Android Studio, Jetpack Compose, MVVM Architecture,
- **Concepts:** OOPs, SDKs,CI/CD and Agile Development.

ACHIEVEMENTS

- Selected as Pre-Incubatee at **MUIDEAS Ideathon** for StealthShield product
- Top 10 at **Aavishkar** Research Competition (District Level)
- Runner-Up – Best Student (2024–2025)
